Plant Growth Regulation **11**: 449–451, 1992.

Volume contents

Volume 11 No. 1

Franklin, F.C.H., Franklin-Tong, V.E., Thorlby, G.J., Howell, E.C., Atwal, K. & Lawrence, M.J., Molecular basis of the incompatibility mechanism in *Papaver rhoeas* L. 5
Stead, A.D., Pollination-induced flower senescence: a review 13
Rogers, H.J. & Lonsdale, D.M., Genetic manipulation of male sterility for the production of hybrid seed 21
Herrero, M., From pollination to fertilization in fruit trees 27
Chapman, G.P., Alternative pathways in grass spikelet development 33
Reid, M.S. & Men-Jen Wu, Ethylene and flower senescence 37
Saks, Y., Staden, J. van & Smith, M.T., Effect of gibberellic acid on carnation flower senescence: evidence that the delay of carnation flower senescence by gibberellic acid depends on the stage of flower development 45
Zieslin, N. & Ben-Zaken, R., Effects of applied auxin, gibberellin and cytokinin on the activity of peroxidases in the peduncles of rose flowers 53
Doorn, W.G. van, Hibma, J. & Wit, J. de, Effect of exogenous hormones on leaf yellowing in cut flowering branches of *Alstroemeria pelegrina* L. 59
Regular papers
Noiton, D., Vine, J.H. & Mullins, M.G., Endogenous indole-3-acetic acid and abscisic acid in apple microcuttings in relation to adventitious root formation 63
Ries, S. & Wert, V., Response of maize and rice to 9-β-L(+) adenosine applied under different environmental conditions 69
Berhow, M.A. & Vandercook, C.E., The reduction of naringin content of grapefruit by applications of gibberellic acid 75
Biddington, N.L., Sutherland, R.A. & Robinson, H.T., The effects of gibberellic acid, fluridone, abscisic acid and paclobutrazol on anther culture of Brussels sprouts 81
Hooley, R., The responsiveness of *Avena fatua* aleurone protoplasts to gibberellic acid 85
Book reviews 91

Volume 11 No. 2

Auer, C.A., Laloue, M., Cohen, J.D. & Cooke, T.J., Uptake and metabolism of benzyladenine during shoot organogenesis in *Petunia* leaf explants 105
Subbaiah, T.K. & Powell, L.E., Abscisic acid relationships in the chill-related dormancy mechanism in apple seeds 115
Yannovits-Argiriadis, N., Dourtoglou, V., Lyberopoulou, D. & Papageorgiou, V., Essential oil variation in dwarf plants of *Pelargonium sp. capitatum*, induced by a new plant growth bioregulator 125
Niedźwiedź-Siegeń I. & Lewak, S., Growth regulators differentially affect photosensitivity induced by low temperature and osmotic stresses in germinating white clover seeds 133
Lownds, N.K. & Bukovac, M.J., Studies on octylphenoxy surfactants: X. Effect of oxyethylene chain length on ethylene production by cowpea and mung bean and comparison with linear alcohol hydrophobes 139
Tillberg, E., Effect of light on abscisic acid content in photosensitive Scots pine (*Pinus sylvestris* L.) seed 147
Scherer, G.F.E., Stimulation of growth and phospholipase, A_2 by the peptides mastoparan and melittin and

by the auxin 2,4-dichlorophenoxyacetic acid 153
Basra, A.S., Sarlach, R.S., Dhillon-Grewal, R. & Malik, C.P., Calcium-mediated changes in peroxidase and O-diphenol oxidase activities of cotton fibres (*Gossypium* spp.) and its possible relationship to ABA 159
Shukla, A., Farooqi Abad, A.H., Shukla, Y.N. & Sharma, S., Effect of triacontanol and chlormequat on growth, plant hormones and artemisinin yield in *Artemisia annua* L. 165
Review
Biddington, N.L., The influence of ethylene in plant tissue culture 173
Short communication
Staden, J. Van & Drewes, F.E., Metabolism of ribosylzeatin-5'- monophosphate by soybean callus 189
Book reviews 193

Volume 11 No. 3

Kelly, K.M., Van Staden, J. & Bell, W.E., Seed coat structure and dormancy 201
Botha, F.C., Potgieter, G.P. & Botha, A.-M., Respiratory metabolism and gene expression during seed germination 211
Hilhorst, H.W.M. & Karssen, C.M., Seed dormancy and germination: the role of abscisic acid and gibberellins and the importance of hormone mutants 225
Thomas, T.H., Some reflections on the relationship between endogenous hormones and light-mediated seed dormancy 239
Research papers
Ellis, R.H., Seed and seedling vigour in relation to crop growth and yield 249
Farrant, J.M., Berjak, P. & Pammenter, N.W., Proteins in development and germination of a desiccation sensitive (recalcitrant) seed species 257
Dreyer, M. & Van de Venter, H.A., Differential effect of temperature on mitrochondrial activity in shoots from freshly harvested and moderately aged kernels of maize (*Zea mays* L.) 267
Drennan, P.M. & Van Staden, J., The effect of ethrel and temperature on the germination of *Manihot glaziovii* Muell. Arg. seeds 273
Villalobos, N. & Martin, L., Involvement of cytokinins in the germination of chick-pea seeds 277
Pinfield, N.J. & Gwarazimba, V.E.E., Seed dormancy in *Acer*: The role of abscisic acid in the regulation of seed development in *Acer platanoides* L. 293
Small, J.G.C. & Gutterman, Y., A comparison of thermo- and skotodormancy in seeds of *Lactuca serriola* in terms of induction, alleviation, respiration, ethylene and protein synthesis 301

Regular papers
Suttle, J.C., Hultstrand, J.F. & Tanaka, F.S., The biological activities of five azido N-substituted phthalimides: potential photoaffinity reagents for gibberellin receptors 311
Phillips, J.P, Xing, T., Gartland, J.S., Gartland, K.M.A. & Elliott, M.C., Variation in β-glucuronidase activity of clones of transformed sugar beet roots 319
Netting, A.G., Willows, R.D. & Milborrow, B.V., The isolation and identification of the prosthetic group released from a bound form of abscisic acid 327
Book reviews 335

Volume 11 No. 4

Beckett, R.P. & Van Staden, J., The effect of thidiazuron on the yield of wheat grown with varying nutrient supply 343
Bailly, C., Corbineau, F. & Côme, D., The effects of abscicic acid and methyl jasmonate on 1-aminocyclopropane 1-carboxylic acid conversion to ethylene in hypocotyl segments of sunflower seedlings, and their control by calcium and calmodulin 349

Epstein, E. & Sagee, O., Effect of ethylene treatment on transport and metabolism of indole-3-butyric acid in citrus leaf midribs 357
Durrant, M.J., Mash, S.J. & Payne, P.A., The use of hydrochloric acid to improve the germination of sugar-beet seed 363
Kumar, A. & Bhatt, V.P., Effects of some natural and synthetic growth regulators on sex-expression of *Myrica esculenta* Buch-Ham. ex D. Don 371
Noiton, D., Vine, J.H. & Mullins, M.G., Effects of serial subculture *in vitro* on the endogenous levels of indole-3-acetic acid and abscisic acid and rootability in microcuttings of 'Jonathan' apple 377
Mapelli, S. & Kinet, J.M., Plant growth regulator and graft control of axillary bud formation and development in the *TO-2* mutant tomato 385
Tanno, N., Takanashi, M., Denboh, T., Abe, M. & Okagami, N., Enzyme-amplified enzyme-linked immunosorbent assay for gibberellin A_4 based on the NAD-dependent redox cycle 391
Ben-Tal, Y., Quantification of ethephon requirements for abscission in olive fruits 397
Yamamoto, K., Saitoh, C., Yokoo, Y., Furukawa, T. & Oshima, K., Inhibition of wilting and autocatalytic ethylene production in cut carnation flowers by *cis*-propenylphosphonic acid 405
Miyamoto, K., Kato-Noguchi, H. & Hashimoto, T., Activities of growth inhibitors isolated from light-grown dwarf pea shoots 411
Stinemetz, C.L., Hasenstein, K.H., Young, L.M. & Evans, M.L., Effect of calmodulin antagonists on the growth and graviresponsiveness of primary roots of maize 419
Kubik, M.P., Buta, J.G. & Wang, C.Y., Changes in the levels of abscisic acid and its metabolites resulting from chilling of tomato fruits 429
Fallahi, E., Simons, B.R., Fellman, J.K. & Colt, W.M., Use of hydrogen cyanamide for apple and plum thinning 435

Short communication

Sankhla, N., Upadhyaya, A., Davis, T.D. & Sankhla, D., Hydrogen peroxide-scavenging enzymes and antioxidants in *Echinochloa frumentacea* as affected by triazole growth regulators 441
